

Butt Buster Portable Roll Cutter

- Models available up to 84" Wide X 72" Diameter
- Custom portable and stationary versions available for all types of operations
- Cut all types of pulp and paper rolls

MAXIMUM VERSATILITY
cut any size roll directly in a pulper, on to a conveyor or into a cart or baler.

“Reduce the mess”

No need to cut an entire roll at one time or transport cut paper from a stationary guillotine to a different location in your operation.

For more information on any of our products or services please visit us on the Web at:

The Butt Buster Roll Cutter provides a myriad of benefits to paper mills that consume their own internal broke as well as purchase broke rolls, while allowing recycling companies, printers and converters an opportunity to maximize the value of all sized rolls for recycling at the highest value. In addition to the portable version, a stationary model is currently available for cutting small butt rolls of paper.

The benefits include:

- Added safety and convenience, including cutting most all sized rolls including, small trim rolls and small diameter rolls
- Reduced time and improved efficiency cutting rolls
- Maximize value of internal and purchased broke rolls
- Minimal space required for roll cutting
- Ability to cut rolls at multiple locations within your operation

We are so convinced you will love the Butt Buster, you can “try it” before you buy it. We have rental units available.
